

1. Cut the paper along the dotted lines of each of 3 worksheets, Top, Middle, Bottom, for the vertical Geologic Time Scale. This will make the Geological Time Scale fit into the tennis ball tubes.
2. Color each Era heading, Cenozoic, Mesozoic, Paleozoic, Precambrian, matching the same colors in the Chronostratigraphic Chart (Geological Time Scale)
3. Research each Era: Cenozoic, Mesozoic, Paleozoic.
4. Identify facts, drawings, labels, and years to your Geologic Time Scale in the blank spaces.
5. When you are done, roll the edge of the paper with the years to the edge of the long bold line to hide these instructions (see arrow), then tape the paper.
6. Place each rolled Geological Time Scale in sequential order in a tennis ball tube container, matching Eras, stacking them in order of oldest time on the bottom to youngest on the top.

Top

Roll edge of years to edge of this bold line

Eras are not to exact scale-only a representation.  
Years match the Chronostratigraphic Chart.

Mesozoic Era  
"Age of the Dinosaurs"

Cenozoic Era  
"Age of the Mammals"
